

Build Your Future in Technology

Industry-Oriented IT Training for Next-Generation Careers

Programs Highlight

Data Science

Full Stack Development

Cloud Computing

Cyber Security

Learn in-demand technologies with practical, career-focused training.

Future-Ready Skills for the Digital Era

Truecare Education brings industry-oriented technology programs powered by Livewire, designed to help students build practical technology skills aligned with today's digital world.

These Livewire programs focus on hands-on learning, real-world applications, and emerging technologies that are shaping modern industries. Students gain exposure to current tools, development environments, and professional workflows used across the IT sector.

Whether your goal is software development, data-driven technologies, cloud infrastructure, or digital security, the programs are designed to provide strong technical foundations and career-focused learning.

Learn emerging technologies through industry-oriented training powered by Livewire.

Livewire Technology Programs

Learn how data is analysed, interpreted, and transformed into meaningful insights.

Data Science

Learn how data is analysed, interpreted and transformed into meaningful insights.

Learning Areas:

- Data Analytics
- Python Fundamentals
- Visualisation & Reporting
- Machine Learning Concepts

Career Pathways:

- Data Analyst
- Junior Data Scientist
- Business Intelligence Support

Full Stack Development

Build modern web applications using front-end and back-end technologies.

Learning Areas:

- MERN stack developer
- Front-End Development
- Back-End Technologies
- Database Integration
- Application Deployment

Career Pathways:

- MERN stack
- Full Stack Developer
- Web Application Developer
- Software Support Executive

Cloud Computing

Understand cloud infrastructure and modern digital deployment environments.

Learning Areas:

- Virtualisation Concepts
- Cloud Services & Deployment
- Infrastructure Management

Career Pathways:

- Cloud Support Associate
- Infrastructure Support
- Cloud Operations Assistant

Cyber Security

Develop foundational skills in digital security and cyber protection practices.

Learning Areas:

- Network Security
- Ethical Hacking Fundamentals
- Threat & Vulnerability Concepts
- Security Practices

Career Pathways:

- Cyber Security Associate
- Security Support Analyst
- IT Security Technician

Industry-oriented technology programs aligned with modern digital transformation trends.

Practical Learning for Real Technology Careers

The Livewire learning approach combines technical knowledge with hands-on training, helping students build confidence in real-world IT environments.

Students benefit from:

Practical
lab-based learning

Industry-oriented
training approach

Project-based
skill development

Exposure to current
technologies and workflows

These structured programs support learners in building strong technical capabilities and exploring opportunities across the growing technology sector.

**A pathway towards future-ready digital careers
through industry-focused technology training.**
